

PROFILE

AI Engineer building systems that have to be right in production, not only in evaluation. Computer vision and document intelligence in Python and PyTorch; LLM, RAG and agent systems on FastAPI backends. I work the full path — dataset preparation, model evaluation, backend integration, business rules, and the human review paths that catch what the model misses.

Open to: AI Engineer · Applied AI / Machine Learning Engineer. Based in Sfax — open to Tunis, remote, or relocation. Available immediately.

- PROFESSIONAL EXPERIENCE
- AI & Software Engineer — Final-Year Engineering Project

Feb 2026 - Jul 2026

Essilor SIVO (EssilorLuxottica)

Sfax, Tunisia

- Built a document-intelligence pipeline that reads the confidential PRECAL forms, now deployed at SIVO: YOLO11 object detection, EfficientNetV2-S classification, TrOCR and GLM-OCR text recognition, business rules and human review.
 - Owned it from requirements to backend integration, including the confidence threshold below which a form goes to a person rather than automatic processing. Detection reached 95.16% mAP@50.

Python · YOLO11 · EfficientNetV2-S · TrOCR · GLM-OCR · RapidFuzz
- Backend Developer Intern

Jul 2025 - Aug 2025

Altavo Partners

Remote · Paris, France

- Built the bank/arbitrator side of Hex-Port, a Hedera trade-finance platform for African exporters: KYC review, document validation, disputes, bank authentication and the approvals releasing escrowed payment on shipment then delivery.
 - Every order state change is written to a Hedera consensus topic, so the audit trail is verifiable rather than asserted.

TypeScript · Node.js · Express · Prisma · PostgreSQL · Hedera SDK · Solidity
- Full-Stack Developer Intern

Jul 2024 - Aug 2024

Infotech Consulting Services (ICS)

Sfax, Tunisia

- Built REST endpoints for the examinations and teaching-assignment side of a university administration platform — exam sessions, invigilation, teacher workload and timetables, student enrolment — and wrote the API documentation the team integrated against.

Laravel · Vue.js · PHP · MySQL

SELECTED PROJECTS

Fytrak — Coaching Platform

Personal project · built solo · 2026

Three-role platform (trainee, coach, admin) built end to end: React Native app, admin console, and a Cloud Functions backend covering coach assignment, write-time aggregation and scheduled reporting. EN/FR/AR with RTL. The Firestore security rules have their own test suite running against the emulator — an untested access rule is an assumption, not a rule.

TypeScript · React Native (Expo) · Firebase · Cloud Functions · i18n

ORYS — Business Management Platform

Team of 4 · 2026 - present · responsible for the AI layer

Multi-tenant SaaS for small companies — invoicing, stock, clients, staff. Building its AI layer: agents that act as the signed-in user, holding no database credential and inheriting that user's permissions, behind one provider interface with OpenAI and Anthropic adapters.

TypeScript · Anthropic & OpenAI SDKs · Zod · Vitest

SmartWarehouse AI

Personal project · 2025 · public repository

Logistics agent deciding gate assignment from plate recognition, with the facts it queries in SQL and the rules it follows in vector retrieval — so a policy change is a document edit, not a redeploy.

FastAPI · Next.js · ChromaDB · YOLO · RAG · Docker

- TECHNICAL SKILLS
- Machine learning

Python, PyTorch, TensorFlow, deep learning, pandas, scikit-learn, NumPy
- Computer vision

YOLO11, EfficientNetV2, OCR, TrOCR, object detection
- Generative AI & NLP

Natural language processing (NLP), LLMs, RAG, AI agents, transformers, ChromaDB, vector databases
- Backend & cloud

Google Cloud (Firebase, Cloud Functions, Firestore), FastAPI, Node.js, REST APIs, SQL, PostgreSQL, MySQL, MongoDB
- Delivery & web

Docker, Git, CI/CD, Agile/Scrum, TypeScript, Next.js, React, React Native
- EDUCATION
- National Engineering Degree in Computer Engineering

Software Engineering & Business Intelligence · IIT, Sfax

Graduated July 2026
- Preparatory Classes for Engineering Schools

Preparatory Institute of Sfax (IPEIS)

2021–2023
